

CPX 2019 TRAINING DAY COURSES

Full-Day Sessions | 9:00 am-4:00 pm

Model Building Basics: In this course, you will learn the foundational Anaplan concepts and technical model building skills that you need to constructively participate in an Anaplan implementation. This is a hands-on course! In step-by-step lessons, you'll build a model designed to meet the needs of end-users of a fictional company.

Suggested Audience: *Beginning Model Builders*

The Anaplan Way for Customers: The Anaplan Way is the five-phase process used to implement an Anaplan project. It is based on the Agile Scrum methodology. In this course, you'll learn the main tasks that take place during each phase. You will also learn the four cornerstones, which are considered in every phase to ensure that the implementation achieves its goal of end-user adoption of Anaplan.

Suggested Audience: *Customers Only*

Data Integration: The Data Integration course provides comprehensive information and hands-on access to all the data integration options. By the end, you will have a better understanding of all integration options such as HyperConnect, Dell Boomi, MuleSoft, Snaplogic and APIs across Workday, Salesforce, MYSQL and Anaplan!

Suggested Audience: *Intermediate/Advanced Model Builders - Current Customers & Partners Only*

Model Optimization: This workshop validates technical expertise in designing and deploying scalable systems in the Anaplan platform. It will include a deep dive on modeling best practices and various technical decision points.

Suggested Audience: *Intermediate/Advanced Model Builders*

Future Master Anaplaner: Applicants for the Master Anaplaner program are invited to join this fun, engaging day-long event where they'll be able to advance knowledge and skills of Anaplan and become certified Master Anaplaners while interacting with fellow applicants and experts.

Suggested Audience: *Customers Only*

Half-Day Sessions

Working with Anaplan's New User Experience (9:00 am-12:00 pm): In this hands-on session, you will practice the basic procedures for using and building with Anaplan's new user experience (NUX). You will learn how to navigate within the NUX, how to design and create apps and pages in the NUX to meet end-user needs, and how to populate those pages with data, visualizations, and navigation links.

Center of Excellence (1:00-4:00 pm): In this session, Anaplan experts will help define an Anaplan Center of Excellence (CoE), provide a template to how to think through which type of CoE is right for your company, and give you the tools and time to build your own CoE development plan, with the goal of increasing your confidence as you return home after CPX. This CoE workshop is comprised of three phases: Learn, Strategize, and Plan. At the end of the workshop, you will have an understanding of the components that are required to set up and run your new Anaplan CoE, including a plan to begin implementing the CoE at your company.
