

Anaplan Netskope Bypass

The following are instructions to bypass Anaplan traffic in Netskope tenant.

To configure Exceptions:

1. Select a steering configuration and click **Exceptions**.
2. Select **Domains** Exception type from the New Exceptions dropdown list.

3. In the New Exception pop-up, enter ***.anaplan.com** and a suitable description in the Notes section. Click **ADD**

The screenshot shows the 'New Exception' dialog box. The dialog has a title bar 'New Exception' with a close button. Below the title bar, there is a paragraph of text: 'Exceptions allow for certain types of traffic to bypass Netskope and go straight to its destination. To add a new exception, specify the type of traffic.' Below this text, there is a section for 'EXCEPTION TYPE*' with a dropdown menu set to 'Domains'. Below the dropdown, there is a text input field containing '*.anaplan.com'. Below the text input field, there is a section for 'ACTION' with a dropdown menu set to 'Bypass'. Below the dropdown, there is a paragraph of text: 'Traffic will go straight to its destination.' Below this text, there is a section for 'NOTES' with a text area containing the text 'Steering configuration exception to bypass Anaplan traffic.'. At the bottom of the dialog, there are two buttons: 'CANCEL' and 'ADD'.

4. Verify that *.anaplan.com has been entered in the exceptions list.

STEERED TRAFFIC [EXCEPTIONS](#)

Exception Type: Domain - Q Application Name - [+ ADD FILTER](#)

[NEW EXCEPTION -](#)

Exceptions
9 EXCEPTIONS FOUND Sort

EXCEPTION	ACTION	TYPE	NOTES
<input type="checkbox"/> *.anaplan.com	Bypass	Domains	Steering configuration exception to bypass Anaplan traffic

5. To confirm that configurations have been applied successfully, open a browser and check that the traffic to Anaplan is not being intercepted by Netskope.
